REPUBLIC OF THE PHILIPPINES
NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY
PRESIDENT FERDINAND E. MARCOS
Chairman

GERARDO P. SICAT
Director General

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES
Acting Executive Director & Civil Registrar-General

At the time this final provincial report went to press, Presidential Decree No. 418 was issued (March 20, 1974) reconstituting the Bureau of the Census and Statistics into a new office under the administrative supervision of the National Economic and Development Authority.

PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Population and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fertility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explanatory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

Other reports to be published are the Special Reports on: a) Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970; the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households; and by type of building cross-classified by type of activity, industry and sex of heads of households.

We are deeply thankful to His Excellency, the President of the Philippines, for authorizing the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and cooperation of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census forms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Manila, Philippines
April, 1974

7. Number Of Occupied Dwelling Units, By Type Of Building, Number Of Rooms And Occupants, Urban And Rural: 1970	493
8. Number Of Dwelling Units, Occupied And Unoccupied, Number Of Households And Household Members, Family Nuclei, By Type Of Building, Urban And Rural: 1970	497
9. Number Of Households In Occupied Dwelling Units With Or Without Radio, TV Set Or Refrigerator, Urban And Rural, By Municipality: 1970	497
10. Number Of Households In Occupied Dwelling Units By Type Of Building, Type Of Lighting Used, Urban And Rural: 1970	499
11. Number Of Households In Occupied Dwelling Units By Type Of Lighting Used, Urban And Rural, By Municipality: 1970	501
12. Number Of Households In Occupied Dwelling Units By Type Of Building, Type Of Water Supply Used, Urban And Rural: 1970	502
13. Number Of Households In Occupied Dwelling Units By Type Of Water Supply Used, Urban And Rural, By Municipality: 1970	504
14. Number Of Households In Occupied Dwelling Units By Type Of Cooking Fuel Used, Urban And Rural, By Municipality: 1970	506
15. Number Of Households In Occupied Dwelling Units By Type Of Toilet Facilities Used, Urban And Rural, By Municipality: 1970	507

EXPLANATORY TEXT

Part I — POPULATION

INTRODUCTION

The 1970 Census of Population taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employees, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

- PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;
- PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and
- PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of constantly referring to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the release of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970 as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of

Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Arm on Community Development; Bureau of Private Schools; Bureau of Public Schools, Budget Commission; Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-in-charge who supervised the field operations, assisted by well-trained central office personnel. For the entire country, there were 2,297 public school principal teachers designated to act as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistant on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist as members.

EXPLANATORY TEXT

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman, and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's are split into two or more parts, each part assigned to one enumerator. The last digit of the ED code indicates whether an ED is split into parts for enumeration purposes.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population is done by personal interview. Each enumerator visits the households within his ED of assignment and obtains the information called for in the population schedules. If the household is an ordinary household (non-sample), the respondent is interviewed using PH Form 2; if a sample household, the respondent is interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion; place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for ever-married women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This maybe the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 specially selected and trained teacher-enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample household schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start.

CONTENT AND COVERAGE

This provincial report is composed of 65 tables presented in four parts.

	No. of tables
Number of inhabitants	8
Economic characteristics	21
Social characteristics	20
Marital status	4
Education and literacy	7
Citizenship	2
Mother tongue	3
Ability to speak Pilipino, English and Spanish	2
Religion	2
Demographic characteristics	16
Fertility	8
Migration	8

EXPLANATORY TEXT

The coverage of the population enumerated in the census and the size of the sample are shown below:

Topic	Table No.	Coverage	Size of sample (percent)
I. Number of inhabitants	1-5	Household and institutional population	100
	6	Household population	5
		Institutional population	100
II. Economic characteristics	1-20	Household population	5
III. Social characteristics			
A. Marital status	1-2	Household and institutional population	100
	3	Household population	100
B. Education and Literacy	4-5	Household population	5
		Institutional population	100
	6-10	Household and institutional population	100
C. Others	11-15	Household and institutional population	100
	16-19	Household population	5
		Institutional population	100
IV. Demographic characteristics			
A. Fertility	1-8	Household population	5
B. Migration	9-14	Household population	5

EXPLANATORY TEXT

On the other hand, the items of data collected and percent of the population for which these items were asked are indicated below:

POPULATION ITEMS OF DATA COLLECTED

Item number	Item	Items collected for 100 percent of the household population	Items collected for 5 percent of the household population	Items collected for 100 percent of the institutional population

P 34	Number of children now living	—	x	—

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration—

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- I. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- II. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week, and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming/fishing.

In the 1960 census the following areas were considered urban:

- I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- II. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the population.
- IV. All other poblaciones having a population of at least 2,500 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Some household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance.

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as his home or the place where he usually sleeps.

EXPLANATORY TEXT

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 a.m. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 1. on vacation;
 2. on business;
 3. schooling below college level;
 4. confined in a hospital, if confinement is not more than six months;
 5. in the Armed Forces, if their absence is not more than six months;
 6. in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employes and domestics who live with the household, or at least sleep in the same unit;
- e. Filipino employes and domestics employed by a foreign family, who will not be enumerated in their usual place of residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students, or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the conjugal family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970 in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. **Single** — denotes a person who has never been married.
- b. **Married** — denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- c. **Widowed** — denotes a married person whose spouse died and up to the census taking has not remarried.
- d. **Separated** — denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. **Divorced** — denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered married life or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union the date at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (Ilongo-Visayan), Ilocano, Bicol, Samar-Leyte, Pampango and Pangasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple message in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools, which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dress-making, beauty culture, hair science, watch repairing, or motor-vehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, infant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is gained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and trade knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertness in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either (a) working for pay or for profit or without pay in the family farm or enterprise; (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who does housekeeping chores in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others".

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fencing the yard, etc., in their own homes.

CLASS OF WORKER

(1) The allocation of a person to a particular class of worker category is basically independent of the occupation or industry in which he works.

(2) The class of worker information refers to the same job described in the occupation and industry column. The classification by class of worker consists of the following categories:

- 1. Wage and salary worker
 - (a) Private employee—working for a private employer for wage, salary, commission, tips, etc.
 - (b) Government employee—working for government or government owned or controlled corporations.
- 2. Own business
 - (a) Self-employed—working in one's business, farm, profession or trade for profit or fee, without paid employees.
 - (b) Employer—working in one's business, farm, profession or trade for profit or fee, with one or more paid employees.
 - (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPLANATORY TEXT

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by the person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person works during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore, persons looking for work for the first time do not have any industry and are separately classified.

Part II — HOUSING

INTRODUCTION

The Census of Housing was taken simultaneously with the Census of Population on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The Census of Housing is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence, were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No. 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

Item No.	A. Characteristics of building:
1	Type of building or house
2	Number of dwelling units in building or house: occupied-unoccupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
	B. Characteristics of dwelling unit:
6	Number of rooms
7	Number of households and persons occupying dwelling unit
8	Type of tenure
	C. Household conveniences
9	Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
12	Type of cooking fuel
13	Type of lighting
14	Source of drinking water
15	Type of toilet facilities

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household in the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

1. Single house — a complete structure intended for a single family or household.
2. Duplex — a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
3. Apartment or accessoria — a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An *accessoria* is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
4. Barong-barong — a shack or makeshift shelter, usually built with light materials.
5. Commercial — a building used for trade and commerce such as a store or an office building.
6. Industrial — a building used for processing or manufacturing, such as a factory plant.
7. Agricultural — any structure used for agriculture purposes, such as barn, warehouse, etc.
8. Institutional — a hospital, school, church, etc.
9. Others — any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or private residences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

1. Galvanized iron, including aluminum and fiberglass
2. Asbestos
3. Concrete, tile
4. Cogon
5. Nipa, anahaw, buri
6. Others (canvas, salvaged materials, billboards)

CONSTRUCTION OF WALL

The kinds of materials used in the construction of the wall are:

1. Concrete, including hollow blocks, adobe stone, bricks, etc.
2. Galvanized iron, including aluminum
3. Wood, including plywood
4. Bamboo, including sawali
5. Nipa, anahaw, buri
6. Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

EXPLANATORY TEXT

TYPE OF TENURE

The type of tenure may be any of the following:

1. Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
2. Owned and part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
3. Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
5. Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
6. Rented and a part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.
7. Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SETS

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working order and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

1. Electricity — from whatever source of power unit
2. Kerosene (gaas) — liquid form
3. Gas (liquefied petroleum) — piped or in cylinder (Esso Gasul, Rockgas, Shellane, Manila Gas, etc.)
4. Wood, including sawdust
5. Charcoal
6. Others — any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The types of lighting are:

1. Electricity — from whatever source of power unit
2. Kerosene (gaas) — whatever the nature of lamp used
3. Oil — any kind of vegetable (or animal) oil other than kerosene
4. Others — any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

1. Piped water system (Municipal, NAWASA)
2. Artesian well
3. Pump
4. Open well
5. Spring
6. Rain water
7. Lake, river, stream, etc.

TYPE OF TOILET FACILITIES

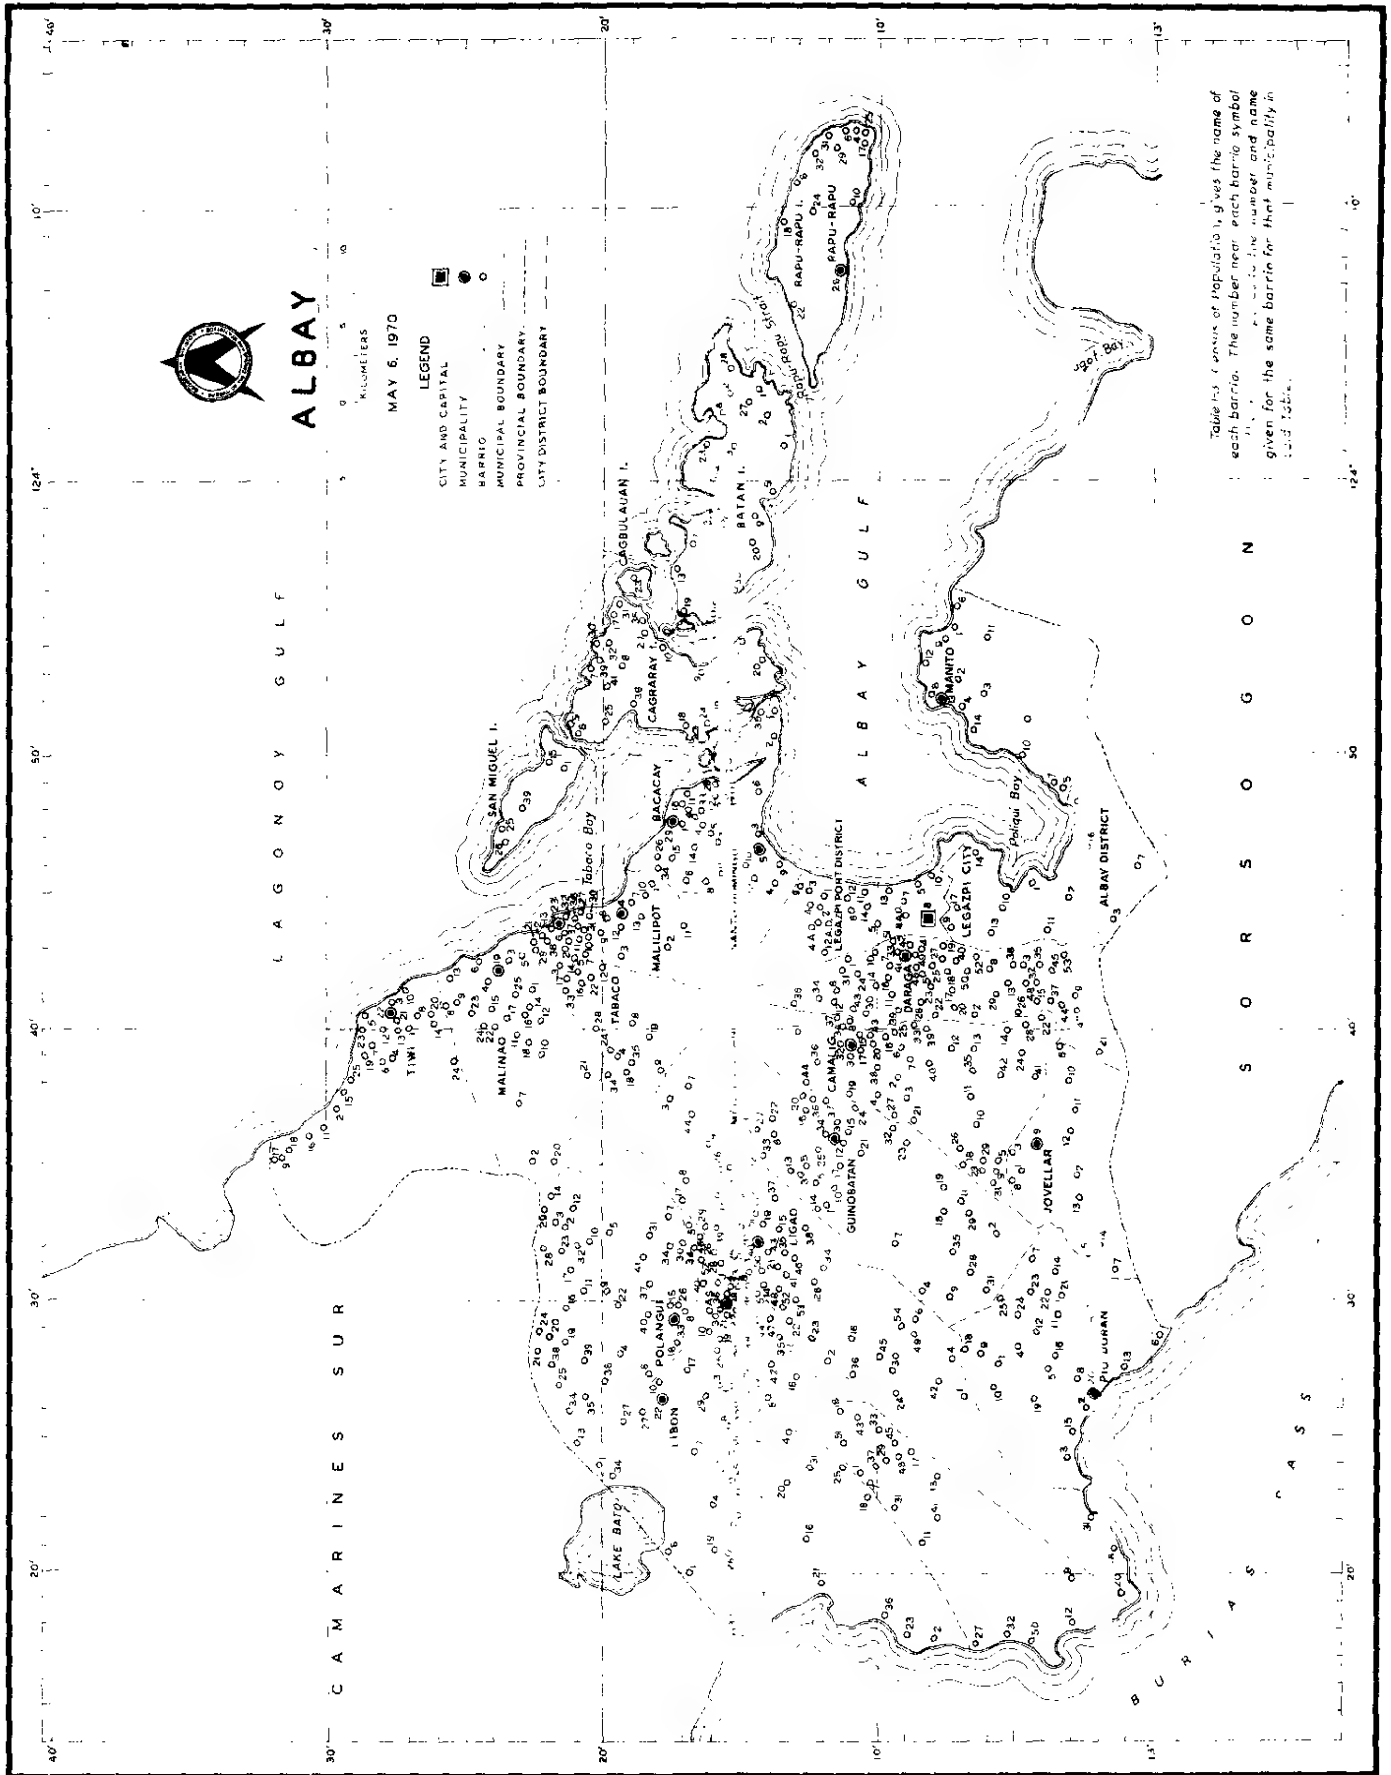

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

1. Flush system/water-sealed — Water-sealed toilet is that type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals in bottom from the pipe leading to the depository. In effect, the flush toilet is one type of water-sealed toilet.

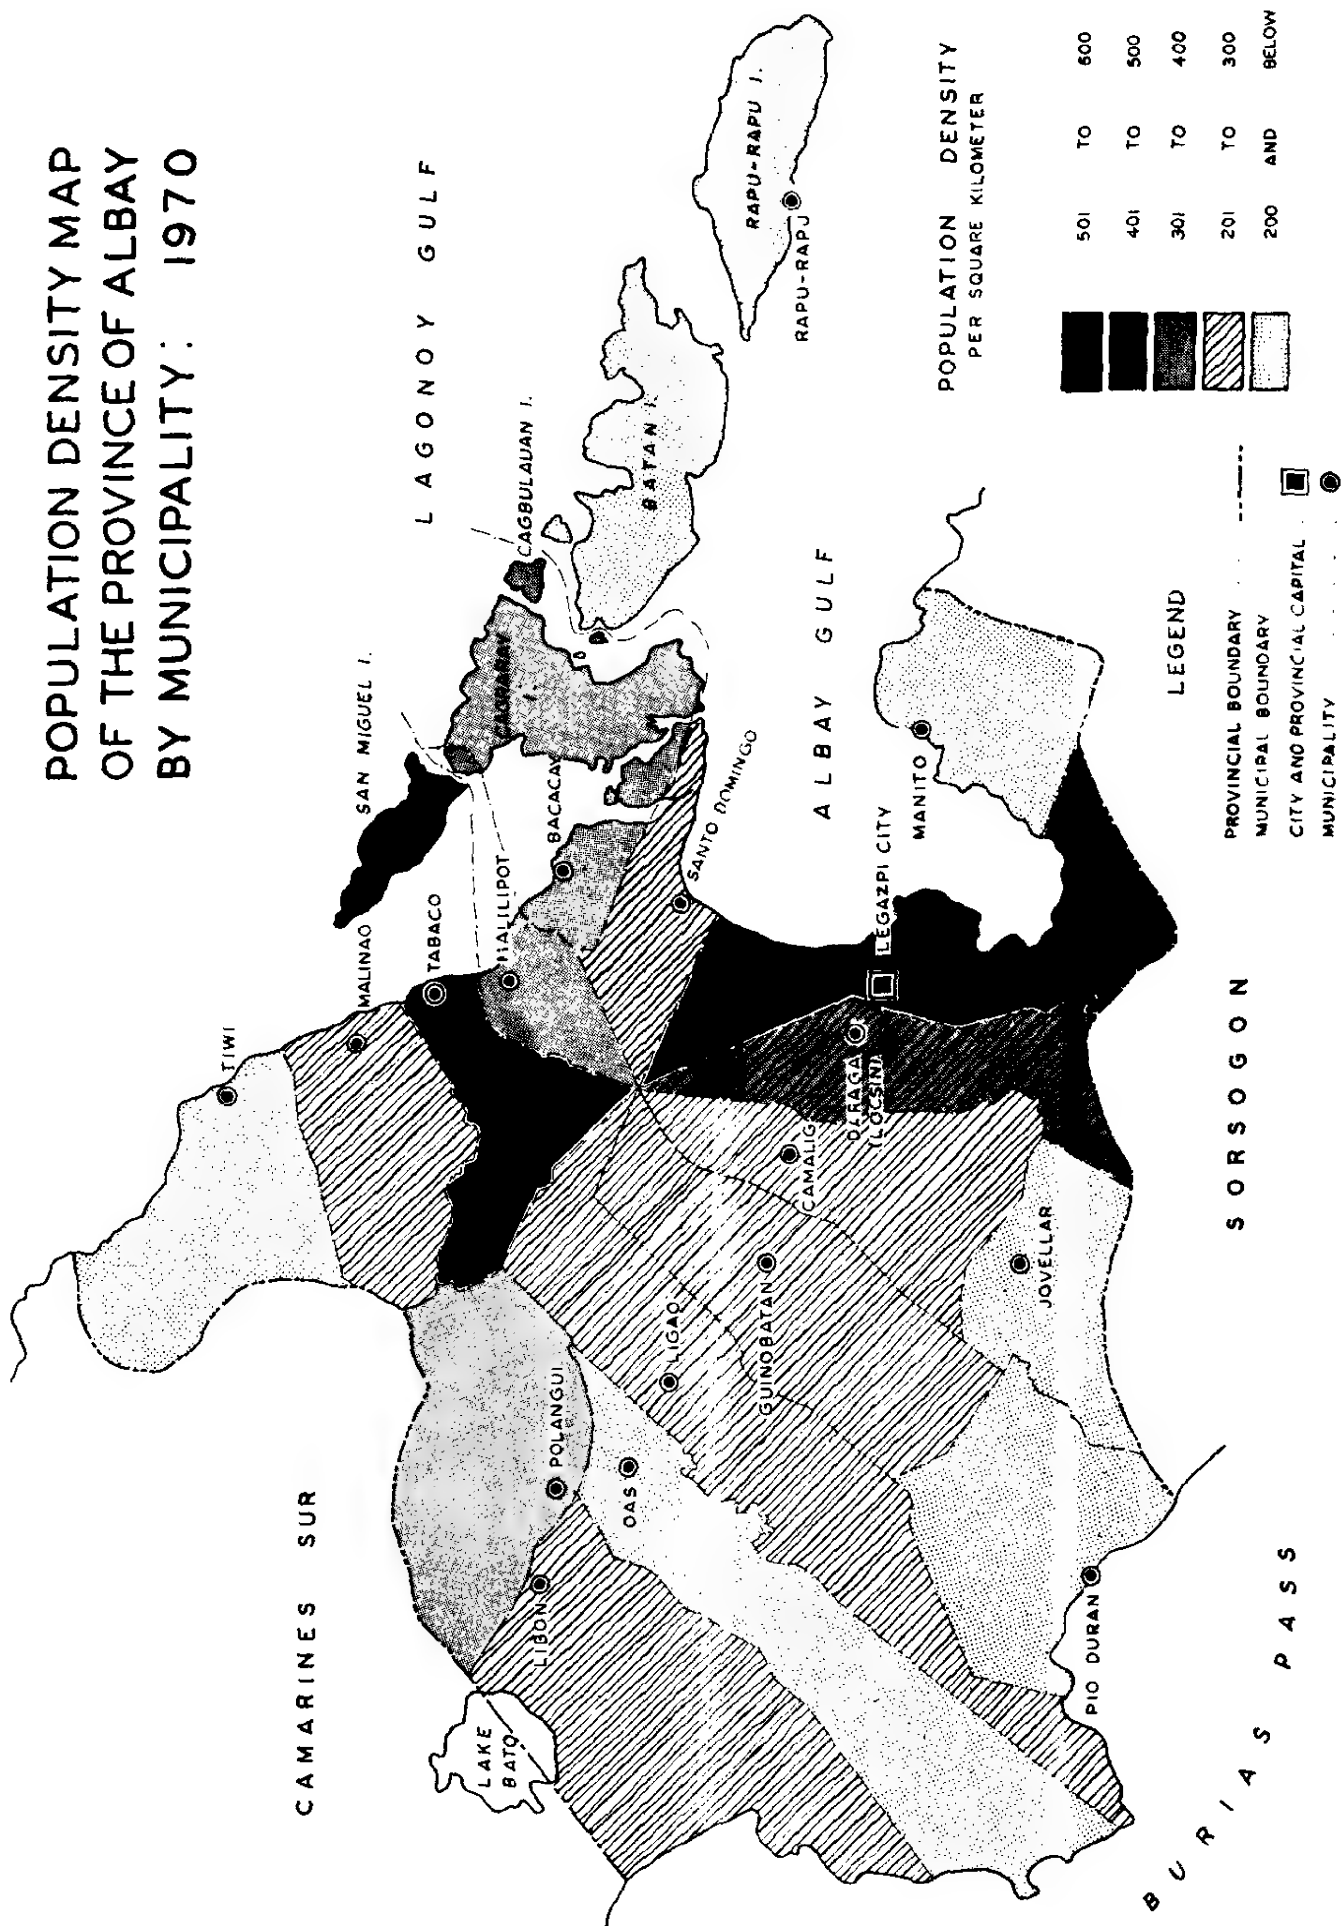

Another type of water-sealed toilet is the cement bowl with a structure quite similar to an enamel bowl. It is connected to a septic tank or concrete depository or sometimes drum or closed pit.

The other kind of cement bowl is constructed much lower than the above-mentioned type to conform to certain Filipino toilet habits

2. Antipolo system or closed pit — is a type of toilet where-in water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
3. Open pit system — is a pit which is entirely open or partly covered.
4. Public toilet — is any type of toilet for communal use.

POPULATION DENSITY MAP OF THE PROVINCE OF ALBAY BY MUNICIPALITY: 1970

Rural country wakes up: above, farmers' wives make use of weaving skills; below, an urban struc

ALBAY

Introduction

The province of Albay lies at the southern tail of Luzon, sandwiched between Camarines Sur on the north and Sorsogon on the south. On the east is the Pacific Ocean; on the southeast, Buriás Pass; and on the northeast, Lagonoy Gulf and Camarines Sur. The provincial terrain is generally mountainous, but around Mayon Volcano and Mt. Malinao are scattered areas of fertile plains and valleys. Mayon Volcano, famous the world over for its beautiful, almost perfect cone, dominates the landscape. Rising over 7,500 feet above sea level, it serves as a landmark of the entire Bicol region. Albay is composed of 17 municipalities and 1 city, Legazpi City, which is the provincial capital.

Land Area and Population

The provincial territory covers an area of 2,552.6 square kilometers, or 0.9 percent of the country's total land area. It has a population of 673,981, of which 99.8 percent are native born (Table 1-6). It ranks number 20 in population size, the rank it also held in 1960 with its population of 514,980. There are more males than females in the province. For every 100 females there are about 102 males (Table 1-4). Albay has a density more than twice that of the entire country. While the average national density is 122.3, that of the province is 264.0, exceeding the country's density by 141.7. In 1960 the provincial density was 201.7, an increase of 62.3 persons per square kilometer during the intercensal years. From 1960 to 1970 the Philippine population increased by 35.4 percent while that of Albay increased by 30.9 percent. The province grew at an annual rate of 2.67 percent, compared to a growth rate of 3.01 percent for the whole country. It ranks number 32 in the rate of population growth between 1960 and 1970.

Urban-Rural Residence

Albay is predominantly rural. Of its total population, only 92,311, or 13.7 percent, live in urban areas in comparison to 581,670, or 86.3 percent in the rural areas. There are more males (50.6%) than females (49.4%) in the rural areas. However, more females (50.7%) than males (49.3%) comprise the urban population (Table 1-4).

Households and Conjugal Family Nuclei

Reported for the province are 109,857 households and 115,464 conjugal family nuclei. An average of 6.1 persons comprise each household and an average of 5.8 persons, each family nucleus (Table 1-3).

Age Composition

The proportion of the youth population of Albay is greater than the youth population of the Philippines. While the country has 43.1 percent of its population in age group 0-14, Albay has 47.8 percent. Correspondingly, the province has a smaller percentage of its population in the working ages (15-64 years) and in the older age group (65 and over) than the entire country. In the working ages, Albay has 49.0 percent and in the older age group, 3.2 percent, while the Philippines has 53.4 percent and 3.5 percent, respectively (Table 1-4). The median age of the population, which is 15.9 years, is 1.5 years lower than that for the country.

The rural population is slightly younger than the urban population. Of the rural population 48.5 percent belong to the age group 0-14 years, while only 43.5 percent of the urban population belong to the same age group.

However, a higher proportion of the working ages are found in the urban areas (52.9%) than in the rural areas (48.4%). The proportion of the older age group is also slightly higher in the urban areas (3.6%) than in the rural areas (3.1%).

Because of its young population, the province has a comparatively high dependency ratio. While the dependency ratio for the Philippines is 87, that for Albay is 104. There are 104 "dependents" for every 100 persons in the productive ages (15-64 years). More dependents are found in the rural areas where the ratio is higher (107), than in the rural areas where the ratio is 89 (Table 1-4).

Economically Active Population

A total of 449,978 persons ten years of age and over are reported for the province. Of this number, more than half (51.5%) are economically active. Most of the those falling under this category (94.9%) are employed, while 8,000 persons (3.4%) are seeking work for the first time. Among those not economically active, 51.9 percent are housekeepers, 6.7 percent are students, and 41.4 percent are classified under "others" (Table II-1).

Class of Worker

The province counts with 223,982 experienced workers, of which 37.5 percent are wage and salary workers, 41.8 percent have their own business, and 20.0 percent are unpaid family workers. Of the wage and salary workers, 84.0 percent are employed by the private sector and 16.0 percent, by the government (Table II-3).

Industry

Albay is highly agricultural, with 52.2 percent of its total experienced workers engaged in agriculture, hunting, forestry and fishing. About 19.0 percent are in manufacturing, followed by 12.8 percent in services, 6.5 percent in commerce, 3.2 percent in construction, and 3.1 percent in transport (Table II-6).

Among those in agriculture, hunting, forestry and fishing 87.0 percent are males and 13.0 percent are females. Of the total economically active male population, 64.9 percent are in agriculture, while of the total economically active female population, one-fifth, or 20.1 percent, are working in the same industrial sector (Table II-1).

Occupation

By occupation one-half of the experience workers (50.4%) are farmers, hunters, fishermen and loggers. Less than one-fourth (23.6%) are craftsmen, production process workers and laborers; 6.9 percent, sales workers; 6.7 percent, service workers; and 3.9 percent, professional, technical and related workers. The rest (8.5%) are distributed among the other occupation groups (Table II-12).

Number of Hours Worked

Of those who were working during the reference period, 43.1 percent worked for 45 hours and over, while 28.5 percent worked for 35 to 44 hours. Only 13.7 percent worked for 25 to 34 hours; 12.0 percent, for 15 to 24 hours; and 2.0 percent, less than 15 hours (Table II-15).

Usual Occupation

Classified by usual occupation for the last twelve months, farmers, hunters, fishermen and loggers comprised 51.1 percent; craftsmen, production process workers and laborers, 21.2 percent; service workers, 7.2 percent; sales workers, 6.2 percent; and professional, technical and

related workers, 5.2 percent. The other occupation groups constituted only 9.1 percent (Table II-19).

Marital Status

A greater proportion (48.8%) of the population 10 years of age and over are single, compared to those who are married which make up 46.6 percent. Only 4.1 percent are widowed and 0.4 percent, either divorced or separated (Table III-1). Among the males more than half (51.5%) are single while 35.9 percent are married. The proportion between the married and the never-married among the females differs slightly; 47.3 percent are married and 46.1 percent are single. In the widowed category, however, there are more females (6.0%) than males (2.2%).

Literacy and Education

Out of 532,151 inhabitants 6 years old and over, 417,665, or 78.5 percent, are literate. The literacy rate in the urban areas is higher, with 85.8 percent, compared to that in the rural areas, which is only 77.2 percent (Table III-4).

Among the population 25 years and over, more than three-fifths, or 64.8 percent, have finished elementary education, while 11.1 percent have completed high school, and 6.5 percent, college. About 17.4 percent have not had any formal schooling at all (Table III-6).

In the 6 years and over group, only 28.2 percent are attending school, with a higher percentage (71.8%) not attending school. However, in the 6-24 year of age bracket, 47.6 percent are attending school. In this group, there are more males (50.7%) than females (49.3%) attending school (Table III-9).

Holders of College Degree

For Albay 5,532 persons are reported as degree holders. Of this number, 3,116, or 56.3 percent, are in the field of Education, followed by the Social Sciences, to which Commerce belongs, with 18.9 percent. The Medical Sciences have 6.1 percent; Engineering, 4.9 percent; the Humanities, 4.2 percent; and Law, 3.6 percent. Only 2.3 percent are in Agriculture, 0.7 percent in Fine Arts, and 0.4 percent in the Natural Sciences, while 2.6 percent are in unspecified courses (Table III-10).

Dialect

Bicol, the only principal dialect in Albay, is spoken by 98.6 percent of the population. The other dialects put together make up only 1.4 percent (Table III-13).

More people speak Pilipino than English in Albay. Of the total population, 55.9 percent speak Pilipino, 45.4 percent, English and 3.3 percent, Spanish (Table III-13).

Religion

The people of Albay are predominantly Roman Catholics; 98.5 percent of the populace are followers of the Roman Catholic Church. Only 0.5 percent belong to the Protestant faith; another 0.5 percent to the Iglesia ni Cristo; and 0.5 percent to other religious groups (Table III-19).

Fertility

The average number of children born alive to ever-married women who have reached the end of their child-bearing period (50 years and over) is 6.0 not only for the province but for the rural areas as well. The average number

is slightly lower in the urban areas, which is only 5.6 children. The proportion of ever-married women who have had no children by the end of their reproductive years is 7.0 for both the urban and the rural areas (Table IV-1).

The average number of children borne by each ever-married woman who has had at least one child is 4.9 for the province. In the urban as well as in the rural areas, the average number is also 4.9.

Majority of the ever-married women in the province married early. Of the 133,862 ever-married women, three-fifths, or 60.4 percent, were married by the age of 20, and almost nine-tenths (88.5%) were married by the age of 25 (Table IV-7).

Migration

Out of 673,981 inhabitants, 560,020, or 83.1 percent, were born in the same municipality where they presently reside; 9.5 percent were born in other municipalities in the same province; and 7.2 percent, in other provinces (Table IV-9).

Of the population 10 years old and over, comprised of 450,596 persons, 86.9 percent are residents of the same municipality where they resided in 1960. Only 6.4 percent were residing in other municipalities within the province of Albay and 6.4 percent were living in other provinces (Table IV-11).

Number of Dwelling Units

The province has 110,652 dwelling units, 108,975 or 98.5 percent of which are occupied with only 1,677, or 1.5 percent, unoccupied. Most of the dwelling units in Albay are single houses (93.1%), while 3.8 percent are "barong-barong"; 1.8 percent, duplex structures; 0.8 percent, commercial buildings; and 0.5 percent, apartments/accessories.

Almost nine-tenths (87.0%) of the dwelling units are located in the rural areas, while those in the urban areas comprise only 13.0 percent (Table 1).

Type of Construction Material of Roof and Walls

About four-fifths of the dwelling units (79.8%) are found in structures with roof built of light materials such as nipa or cogon. Dwelling units in structures with roof of strong materials (aluminum, asbestos, tile or concrete) constitute only 16.9 percent.

More than two-thirds of the dwelling units in the urban areas (68.5%) are also found in structures with roof of light materials, while less than one-third (30.8%) are in structures with roof built of strong materials. The proportion of dwelling units in structures with roof of light materials is even higher in the rural areas, with 81.6 percent, while those with roof of strong materials comprise only 14.7 percent (Table 2).

By type of construction materials of wall, 55.9 percent of the dwelling units are in structures with walls of strong materials, and 42.8 percent, with walls of light materials. Dwelling units in the urban areas are predominantly found in structures with walls made of strong materials (83.7%); those in structures with walls of light materials make up only 16.0 percent. A similar trend is seen in the rural areas, although the proportion between dwelling units in structures with walls of strong materials (51.8%) is lower than that in the urban areas, while those in

structures with walls of light materials (46.8%) is higher (Table 2).

Type of Tenure

Out of 108,975 occupied dwelling units in Albay, 95.8 percent are owner-occupied. This category includes those that are owned and a part rented out, and owned and a part occupied free by others. Dwelling units that are rented only, rented and a part occupied free by others, and rented and a part rented out, comprise 2.7 percent, and those that are occupied rent-free, 1.5 percent (Table 3).

In most cases dwelling units in both the urban (85.4%) and the rural areas (97.4%) are owner-occupied only, owned and a part rented out, and owned and a part occupied free by others. There are more rented dwelling units (12.0%) in the urban areas than in the rural areas (1.2%).

Year of Construction

More than half (51.8%) of the structures containing dwelling units were built during 1965-1970; about one-third (33.8%) were built during 1955-1964; and 11.5 percent during 1945-1954 (Table 4). The proportion of structures built prior to World War II is higher (2.1%) than those built during the second World War (1942-1944), which is only 1.0 percent.

Number of Households in Each Dwelling Unit

In a majority of cases each dwelling unit is occupied by only one household (98.5%) and seldom by 2 (1.2%). This holds true for the urban as well as the rural areas where dwelling units containing only one household constitute respectively, 96.3 percent and 98.8 percent. Only 3.0 percent. Only 3.0 percent of the dwelling units in the urban areas are occupied by 2 households, and only 1.1 percent, in the rural areas (Table 5).

Number of Rooms

Of the total number of dwelling units, 29.1 percent have 2 rooms; 24.1 percent, one room; 12.4 percent, 4 rooms; and 4.9 percent, 5 rooms. Those having 6 rooms make up only 1.8 percent, while 0.8 percent have 7 rooms, and 0.7 percent, 8 or more (Table 7).

Ownership of Radio, Television Set and Refrigerator

Most of the 109,857 households in Albay are without radio (60.5%), without television set (99.9%) and without refrigerator (98.0%). In sharp contrast, 35.8 percent own radios, 2.0 percent have refrigerators, and an insignificant 0.1 percent owners of television sets (Table 9). A higher proportion of the urban households have radios (57.8%), while 42.2 percent are without radios. The reverse is true in the rural areas, where 63.3 percent have no radios and 36.7 percent own radios. However, in both the urban and the rural areas, most of the households do not own television sets or refrigerators. Of the households in the urban areas, 99.8 percent are without television sets and 92.7 percent have no refrigerators. The corresponding figures for the rural areas are 99.9 percent and 98.8 percent, respectively (Table 9).

Lighting Facilities

Kerosene, which is the most common type of lighting in the province, is used by 88.3 percent of the households. Electricity is used by 11.2 percent; oil, by 0.2 percent; and "others", by 0.3 percent. The proportion of households using kerosene for lighting is very much higher in the rural areas (93.3%) than in the urban areas (55.0%). Correspondingly, more urban households (44.8%) use electricity, compared to the rural households, with only 6.2 percent (Table 11).

Type of Water Supply

More than 31 thousand households, or 28.4 percent of the total number of households, depend on piped water as their source of water supply, while 25.9 percent used the pump, 22.0 percent, the open well, and 19.1 percent, spring water (Table 13). Piped water is used by 69.0 percent of the urban households, and the pump, by 20.8 percent. A small percentage use the artesian well (3.4%), the spring (3.4%), and the open well (3.2%). In the rural areas, however, more than one-fourth (26.7%) of the households use the pump, nearly one-fourth (24.9%) the open well, a little over one fifth (22.2%), piped water, and also a little over one-fifth (21.5%), spring water. Only 4.2 percent use the artesian well (Table 13).

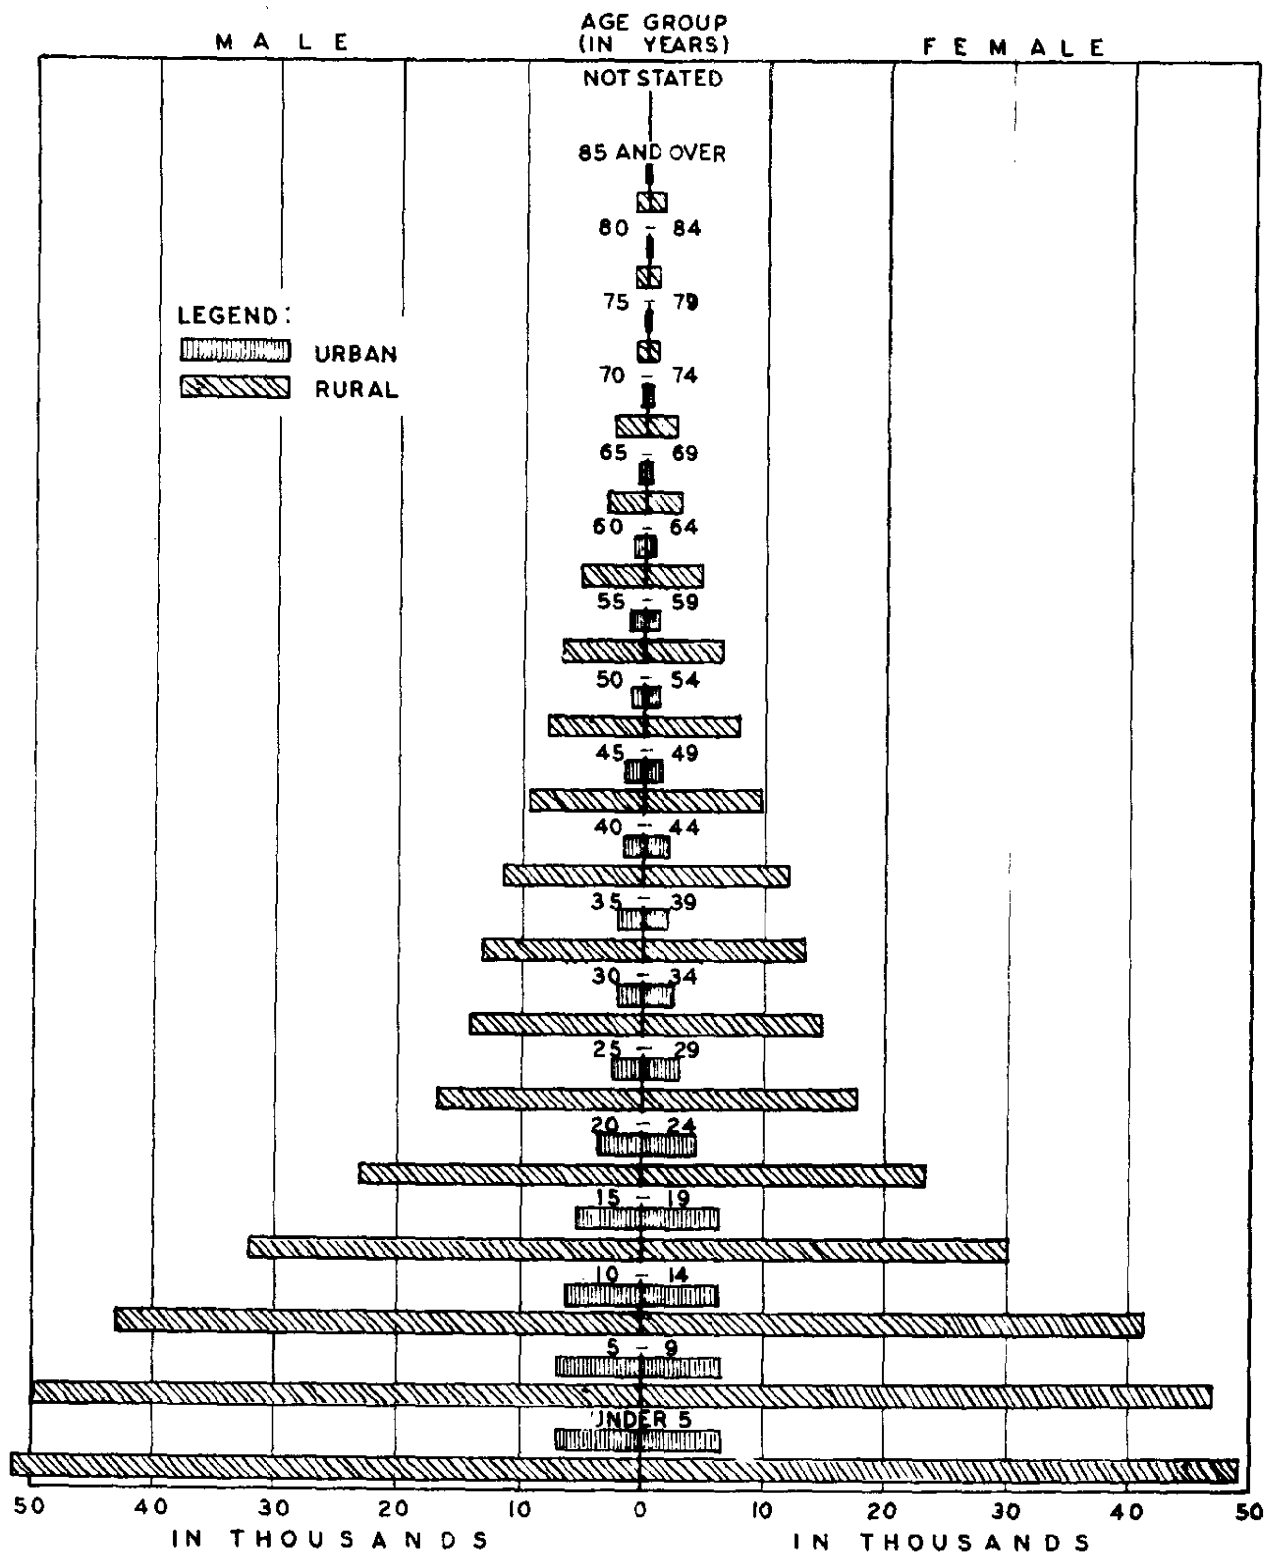

Cooking Fuel

The use of wood as cooking fuel is predominant in the province of Albay, with nine-tenths (90.1%) of the total number of households using it. Kerosene is used by 6.6 percent; gas (liquefied petroleum), by 2.6 percent, and electricity, by only 0.4 percent. Most of the households in the urban as well as in the rural areas also use wood as cooking fuel, although the proportion of wood users is higher in the rural (93.0%) than in the urban (70.6%) areas. Kerosene is used by 9.6 percent of the urban households, compared to 4.9 percent of the rural households. Less than one-tenth (9.6%) of the households in the urban areas use gas or liquefied petroleum, while electricity is used by only 165 households, or 1.2 percent. Rural households rarely use gas (0.6%) or electricity (0.2%) for cooking (Table 14).

Toilet Facilities

About one-tenth (10.1%) of the provincial households have the flush or water-sealed toilets; 11.7 percent, the antipolo or closed pit; and more than one-fourth (26.9%), the open pit. Nearly half (49.8%) of the households are without toilet facilities, while 1.5 percent use the public toilets. Toilet facilities in the urban areas are better, compared to that in the rural areas. Of the urban households, 30.4 percent use the flush or water-sealed type of toilet; 16.7 percent, the antipolo or closed pit; 18.7 percent, the open pit, and 3.4 percent, the public toilets, while 30.8 percent have no toilet facilities. In the rural areas, more than half of the households (52.6%) are without toilet facilities, although only 1.2 percent use the public toilets. However, 28.2 percent have the open pit; 10.9 percent, the antipolo or close pit, and only 7.1 percent the flush or water-sealed toilets (Table 15).
